Hint and Tip Number 12: Why Install Convection Heater

February 8th, 2018

You love the benefits that a heat pump brings to your home, but your budget will not allow you to install heat pumps in every room of your home. What do you do if you have a hobby room or other rooms you spend time in and you want to keep it warm and cozy in the cold days? Consider installing a Convection Heater.

The Benefits Of An Convection Heater

- ⇒ Convection Heaters warm up a room evenly. That's because the warm air they create rises and falls uniformly across an enclosed space.
- ⇒ With Convection Heaters, the temperature of each room can be controlled individually.
- ⇒ Convection Heaters will save about 10% more energy than your basic electric baseboard heaters.
- ⇒ They are easy to fit into your home's décor.
- ⇒ Convection Heaters provide a comfortable kind of heat that warms your room quickly.

Contact the experts at Thomas Edison Electric to discuss your options of installing a Convection Heater in your home.
