Hint and Tip Number 36: Benefits Of A Maintenance Agreement **July 30th, 2018**

Life is stressful enough without worrying about when things go wrong with your heat pump or generator. One way to reduce this stress is to have a Preventive Maintenance Agreement.

Here are some of the reasons why it is a good idea:

1. **Lower cost over time:** when you maintain your equipment, the repair costs tend to be lower, and failure happens less frequently. Your equipment operates more efficiently when well maintained, saving you money on operating costs like your utility bills. This may also reduce the pressure on emergency funds for sudden breakdowns and repair.
2. **Peace of mind:** Besides saving money, regular maintenance will reduce the chance of you getting stuck with the discomfort of heat or cold when your heat pump fails to run properly or getting caught in the dark because your Automatic Standby Power Generator fails to turn on. A maintenance agreement will also lengthen the lifespan of the components in your equipment. This postpones replacement and allows you to maximize the use of your equipment.
3. **Keeping your warranty:** Some manufacturers won't replace a part if the unit has not been maintained by a professional. Rather than having to remember to schedule and keep up with maintenance yourself, having an agreement in place ensures that you keep the added protection of a warranty should your parts fail.
