To Helpful Hints and Tips from Thomas Edison Electric

Hint and Tip Number 42: Study Tips

September 10th, 2018

It's back to school time and Thomas Edison Electric would like to take this opportunity to pass on some simple study tips for the students in your home.

- **Determine A Designated Study Space:** Avoid distractions and draw a clear line between play time and study time by setting up a study area in a quiet, well-lit place. It should be well stocked with school supplies, have access to a computer with internet, and plenty of work space.
- **Make A Plan:** How much homework does your child have? Does your child need to study on their own in addition to assigned homework? Which subject does your child struggle the most with? Help your child to prioritize, set goals, and practice time management by keeping track of assignments. Make use of a planner or wall calendar with important deadlines.
- **Form A Study Group:** Your child will likely show more interest in completing homework assignments and projects if they can bounce ideas off a friend. Choose a day of the week to invite some of your child's classmates over so they can help each other out and make studying fun.
- **Give Guidance, Not Answers:** When your child asks for homework help, give them the tools they need to find the answer themselves, whether it is a internet site with the information required or a text book. This practice of having them find the answers by themselves will benefit them in the long run. Doing the homework for them will not help them in their quest for knowledge.

If you need any electrical work done like extra electrical outlets or installation of light fixtures or surge protection, give the experts at Thomas Edison Electric a call.
